Eventually, you will entirely discover a additional experience and expertise by spending more cash. still when? do you acknowledge that you require to acquire those every needs in imitation of having significantly cash? Why dont you attempt to acquire something basic in the beginning? Thats something that will lead you to understand even more more or less the globe, experience, some places, following history, amusement, and a lot more?

It is your enormously own get older to do something reviewing habit. in the middle of guides you could enjoy now is **download/corporate profile al hassan** below.

Contemporary Bioethics-Mohammed Ali Al-Bar 2015-05-27 This book discusses the common principles of morality and ethics derived from divinely endowed intuitive reason through the creation of al-fitr' a (nature) and human intellect (al-'aql). Biomedical topics are presented and ethical issues related to topics such as genetic testing, assisted reproduction and organ transplantation are discussed. Whereas these natural sources are God's special gifts to human beings, God's revelation as given to the prophets is the supernatural source of divine guidance through which human communities have been guided at all times through history. The second part of the book concentrates on the objectives of Islamic religious practice - the maqa' sid - which include: Preservation of Faith, Preservation of Life, Preservation of Mind (intellect and reason), Preservation of Progeny (al-nasl) and Preservation of Property. Lastly, the third part of the book discusses selected topical issues, including abortion, assisted reproduction devices, genetics, organ transplantation, brain death and end-of-life aspects. For each topic, the current medical evidence is followed by a detailed discussion of the ethical issues involved.

Economics of Land Degradation and Improvement - A Global Assessment for Sustainable Development-Ephraim Nkonya 2015-11-11 This volume deals with land degradation, which is occurring in almost all terrestrial biomes and agro-ecologies, in both low and high income countries and is stretching to about 30% of the total global land area. About three billion people reside in these degraded lands. However, the impact of land degradation is especially severe on livelihoods of the poor who heavily depend on natural resources. The annual global cost of land degradation due to land use and cover change (LUCC) and lower cropland and rangeland productivity is estimated to be about 300 billion USD. Sub-Saharan Africa (SSA) accounts for the largest share (22%) of the total global cost of land degradation. Only about 38% of the cost of land degradation due to LUCC - which accounts for 78% of the US\$300 billion loss - is borne by land users and the remaining share (62%) is borne by consumers of ecosystem services off the farm. The results in this volume indicate that reversing land degradation trends makes both economic sense, and has multiple social and environmental benefits. On average, one US dollar investment into restoration of degraded land returns five US dollars. The findings of the country case studies call for increased investments into the rehabilitation and restoration of degraded lands, including through such institutional and policy measures as strengthening community participation for sustainable land management, enhancing government effectiveness and rule of law, improving access to markets and rural services, and securing land tenure. The assessment in this volume has been conducted at a time when there is an elevated interest in private land investments and when global efforts to achieve sustainable development objectives have intensified. In this regard, the results of this volume can contribute significantly to the ongoing policy debate and efforts to design strategies for achieving sustainable development goals and related efforts to address land degradation and halt biodiversity loss.

Cyber Security and Computer Science-Touhid Bhuiyan 2020-07-29 This book constitutes the refereed post-conference proceedings of the Second International Conference on Cyber Security and Computer Science, ICONCS 2020, held in Dhaka, Bangladesh, in February 2020. The 58 full papers were carefully reviewed and selected from 133 submissions. The papers detail new ideas, inventions, and application experiences to cyber security systems. They are organized in topical sections on optimization problems; image steganography and risk analysis on web applications; machine learning in disease diagnosis and monitoring; computer vision and image processing in health care; text and speech processing; machine learning in health care; blockchain applications; computer vision and image processing in health care; malware analysis; computer vision; future technology applications; computer networks; machine learning on imbalanced data; computer security; Bangla language processing.

Grasping the Nettle of Peace-Khaled Al-Hassan 1992 Khaled al-Hassan is a veteran figure within the Palestinian movement. With Yasser Arafat, he co-founded Fateh the main within the PLO over thirty years ago. Today, as chairman of the foreign affairs committee of the Palestine National Council (the PLO parliament-in-exile), he is an outspoken moderate who is not afraid of courageous initiatives. In Grasping the Nettle of Peace he spells out a bold plan for Middle East peace, advocating a radical new strategy based on a Swiss-style confederation of Israel, Palestine and Jordan. Al-Hassan's views are not official PLO policy: they are an appeal for greater vision from the Palestinian leadership carrying the weight of a man whose commitment to peace is long-standing. Following the start of the Arab-Israeli dialogue, this blueprint for the future could not be more timely. An invaluable section of the book includes important documents and UN resolutions relating to the question of Palestine.

Droughts, Food and Culture-Fekri A. Hassan 2007-05-08 Recent droughts in Africa and elsewhere in the world, from China to Peru, have serious implications for food security and grave consequences for local and international politics. The issues do not just concern the plight of African peoples, but also our global ecological future. Global climatic changes become manifest initially in regions that are marginal or unstable. Africa's Sahel zone is one of the most sensitive climatic regions in the world and the events that have gripped that region beginning in the 1970's were the first indicator of a significant shift in global climatic conditions. This work aims to bring archaeology with the domain on contemporary human affairs and to forge a new methodology for coping with environmental problems from an archaeological perspective. Using the later prehistory of Africa as a comparison, the utility of this methodological strategy in interpreting culture change and assessing long-term response to current, global climatic fluctuations is examined and understood.

Lean and Agile Software Development-Adam Przybyłek

Irrigated Agriculture in Egypt-Masayoshi Satoh 2017-03-07 This book targets the issue of water scarcity in Egypt as a typical example of the world water crisis. Today, the available water resource is facing its limit because of rapid increase in water demand as a result of population growth and changes in peoples' life-style. The basic idea to solve the problem of water scarcity is that the irrigation sector, the biggest user of water, should increase water use efficiency. However, the real problem is how this can be achieved in view of the crucial need for water in this sector. This book addresses this challenge through case studies from the Nile delta in Egypt. The water problem in the Nile delta, the major source for water in Egypt, is discussed in this book from all its various aspects. This book covers the situation before and after the advent of the Aswan High Dam, so that the reader understands the entire development. Another special feature are the extensive and scientific descriptions of contemporary topics in water and agriculture, especially from the viewpoint of water saving and sustainability. These descriptions are based on field experiments and surveys in a six-year international research project. Topics of this book are local, but their implications are global.

Life as a Weapon-Riaz Hassan 2014-09-11 Suicide bombing has become a weapon of choice among terrorist groups because of its lethality and ability to cause mayhem and fear. But who carries out these acts, and what motivates them? By undertaking analysis of the information in the most comprehensive suicide terrorism database in the world, Life as a Weapon seeks to question and in turn undermine the common perception that the psychopathology of suicide bombers and their religious beliefs are the principal causes. Instead, the book presents a cocktail of motivations that drive suicide bombers, and explains how their actions achieve multiple purposes - community approval, political success, liberation of the homeland, personal redemption or honour, refusal to accept subjugation, revenge, anxiety, defiance. Since the configuration of these driving factors is also specifically related to the circumstances of political conflict in each different country, it is only through gaining understanding and knowledge of these conditions that appropriate policies and responses can be developed that will protect the public and counter the scourge of suicide bombings. Life as a Weapon is a pivotal text in the discussion surrounding suicide bombings, and as such it is of relevance to undergraduate students, postgraduates, and researchers working in areas such as Security Studies, Middle Eastern Studies, Terrorism, Criminology and Political Science.

The Soils of Egypt-Hassan El-Ramady 2018-08-20 This book reviews the distribution of soils across Egypt, their history, genesis, pollution and management. The conservation of Egyptian soils, soils and their connections to human activities, as well as some future soil issues are also highlighted. It is well known that soil is the main

source for food, feed, fuel and fiber production. Accordingly, the study of soils is not only a crucial issue but also an urgent task for all nations worldwide. Due to their important roles in agroecosystems as well as many aspects of our lives, soils have direct and indirect functions in the agricultural, industrial and medicinal sectors. Therefore, understanding the physical, chemical and biological properties of soils, as well as soil security, have now become emerging issues. Climate change has a very dangerous dimension in Egypt concerning the rising sea level. Many coastal zones are already threatened by this sea level rise, and may ultimately disappear. At the same time, water shortages and soil pollution represent the main challenges for the Egyptian nation. Generally speaking, the environmental challenges that Egypt now faces include improving and sustaining soil health, soil carbon sequestration, wastewater treatment, and avoiding the overuse of fertilizers and pesticides. Therefore, this book examines in detail the soils of Egypt from various perspectives including their genesis, history, classification, pollution and degradation, soil security, soil fertility and land uses.

The GCC Economies-Mohamed A. Ramady 2012-04-23 The 'Arab Spring' of 2011 has affected the countries of the region to varying degrees, including the Gulf Cooperation Council (GCC) members, comprising Saudi Arabia, Kuwait, Qatar, the United Arab Emirates, Oman and Bahrain. The GCC has become a significant regional bloc playing a vital economic and political role far beyond its shores, given its geopolitical strategic location, a preponderance of global energy reserves and a major international player through the use of accumulated financial reserves. A new Gulf is rising, one that is more self assertive, looking to expand its membership to other Arab countries such as Jordan and Morocco, while at the same time strengthening the bloc's relationship with current and emerging trading and strategic partners in Europe, USA and Asia. Regional and international realities, especially the uncertainties unleashed by the 'Arab Spring', are forcing Gulf leadership to initiate new policies involving closer cooperation amongst GCC countries to address emerging challenges. This volume brings together thirty renowned academics and specialists to examine a range of multifaceted social, political and economic issues facing the GCC in key areas such as: · Diversification from a high dependency on a narrow hydrocarbon base · Social transformation, youth employment and effective gender participation · Outward and inward foreign direct investment flows · Prospects for education reforms and e-learning. · Sustainable security in oil, renewable energy (including nuclear) and food · Corporate governance, transparency and enhancing the private sector's operating environment · The role and governance of Gulf Sovereign Wealth Funds in investing their surpluses. The volume also offers insights for challenges facing the GCC in monetary union, expanding the regional debt market and Sukuk issuance, GCC intellectual property rights application, detailed assessments of individual GCC country risk analysis, as well as the sustainability of long term government fiscal stimulus programs at the expense of private sector involvement.

Advanced Machine Learning Technologies and Applications-About Ella Hassanien 2020-05-25 This book presents the refereed proceedings of the 5th International Conference on Advanced Machine Learning Technologies and Applications (AMLTA 2020), held at Manipal University Jaipur, India, on February 13 - 15, 2019, and organized in collaboration with the Scientific Research Group in Egypt (SRGE). The papers cover current research in machine learning, big data, Internet of Things, biomedical engineering, fuzzy logic and security, as well as intelligence swarms and optimization.

Computer Modeling and Simulation of Dynamic Systems Using Wolfram SystemModeler-Kirill Rozhdestvensky 2020-03-20 This book briefly discusses the main provisions of the theory of modeling. It also describes in detail the methodology for constructing computer models of dynamic systems using the Wolfram visual modeling environment, SystemModeler, and provides illustrative examples of solving problems of mechanics and hydraulics. Intended for students and professionals in the field, the book also serves as a supplement to university courses in modeling and simulation of dynamic systems.

Second RILEM International Conference on Concrete and Digital Fabrication-Freek P. Bos 2020-07-08 This book gathers peer-reviewed contributions presented at the 2nd RILEM International Conference on Concrete and Digital Fabrication (Digital Concrete), held online and hosted by the Eindhoven University of Technology, the Netherlands from 6-9 July 2020. Focusing on additive and automated manufacturing technologies for the fabrication of cementitious construction materials, such as 3D concrete printing, powder bed printing, and shotcrete 3D printing, the papers highlight the latest findings in this fast-growing field, addressing topics like mixture design, admixtures, rheology and fresh-state behavior, alternative materials, microstructure, cold joints & interfaces, mechanical performance, reinforcement, structural engineering, durability and sustainability, automation and industrialization.

Business Week- 1995

Encyclopedia of Medieval Philosophy-Henrik Lagerlund 2010-12-07 This is the first reference ever devoted to medieval philosophy. It covers all areas of the field from 500-1500 including philosophers, philosophies, key terms and concepts. It also provides analyses of particular theories plus cultural and social contexts.

The Oxford Handbook of Populism-Cristobal Rovira Kaltwasser 2017-10-26 Populist forces are becoming increasingly relevant across the world, and studies on populism have entered the mainstream of the political science discipline. However, so far no book has synthesized the ongoing debate on how to study the populist phenomenon. This handbook provides state of the art research and scholarship on populism, and lays out, not only the cumulated knowledge on populism, but also the ongoing discussions and research gaps on this topic. The Oxford Handbook of Populism is divided into four sections. The first presents the main conceptual approaches on populism and points out how the phenomenon in question can be empirically analyzed. The second focuses on populist forces across the world and includes chapters on Africa, Australia and New Zealand, Central and Eastern Europe, East Asia, India, Latin America, the Post-Soviet States, the United States, and Western Europe. The third reflects on the interaction between populism and various relevant issues both from a scholarly and political point of view. Amongst other issues, chapters analyze the relationship between populism and fascism, foreign policy, gender, nationalism, political parties, religion, social movements and technocracy. Finally, the fourth part includes some of the most recent normative debates on populism, including chapters on populism and cosmopolitanism, constitutionalism, hegemony, the history of popular sovereignty, the idea of the people, and socialism. The handbook features contributions from leading experts in the field, and is indispensable, positioning the study of populism in political science.

Climate Change Adaptation in Africa-Walter Leal Filho 2017-03-27 This collection showcases experiences from research and field projects in climate change adaptation on the African continent. It includes a set of papers presented at a symposium held in Addis Abeba in February 2016, which brought together international experts to discuss "fostering African resilience and capacity to adapt." The papers introduce a wide range of methodological approaches and practical case studies to show how climate change adaptation can be implemented in regions and countries across the continent. Responding to the need for more cross-sectoral interaction among the various stakeholders working in the field of climate change adaptation, the book fosters the exchange of information on best practices across the African continent.

Model and Data Engineering-El Hassan Abdelwahed 2018-09-13 This book constitutes the refereed proceedings of the 8th International Conference on Model and Data Engineering, MEDI 2018, held in Marrakesh, Morocco, in October 2018. The 23 full papers and 4 short papers presented together with 2 invited talks were carefully reviewed and selected from 86 submissions. The papers covered the recent and relevant topics in the areas of databases; ontology and model-driven engineering; data fusion, classification and learning; communication and information technologies; safety and security; algorithms and text processing; and specification, verification and validation.

Antibacterial Drug Discovery to Combat MDR-Iqbal Ahmad 2019-11-09 This book compiles the latest information in the field of antibacterial discovery, especially with regard to the looming threat of multi-drug

resistance. The respective chapters highlight the discovery of new antibacterial and anti-infective compounds derived from microbes, plants, and other natural sources. The potential applications of nanotechnology to the fields of antibacterial discovery and drug delivery are also discussed, and one section of the book is dedicated to the use of computational tools and metagenomics in antibiotic drug discovery. Techniques for efficient drug delivery are also covered. The book provides a comprehensive overview of the progress made in both antibacterial discovery and delivery, making it a valuable resource for academic researchers, as well as those working in the pharmaceutical industry.

World Report 2020-Human Rights Watch 2020-01-28 The best country-by-country assessment of human rights. The human rights records of more than ninety countries and territories are put into perspective in Human Rights Watch's signature yearly report. Reflecting extensive investigative work undertaken by Human Rights Watch staff, in close partnership with domestic human rights activists, the annual World Report is an invaluable resource for journalists, diplomats, and citizens, and is a must-read for anyone interested in the fight to protect human rights in every corner of the globe.

The Key to Understanding Islam-Abdurrahman Al-Sheha 2018-07-02 This book explains that Islam is a code of living that covers all aspects of life. It comprises a set of acts of worship: some verbal, some practical and others that are constituents of belief. All of them play important roles in placing morality on a solid foundation and in strengthening the good qualities in people so that they are keen to follow the right path, ensuring social unity and strengthening bonds within the community.

Saddam Hussein-Saïd K. Aburish 2001-01-22 'A brilliant Arab-Western examination.Written with pace, detail, and a host of witnesses and sources' Sunday Tribune

Bio-based Polymers and Nanocomposites-Muhammed Lamin Sanyang 2019-02-05 This book highlights the various types of polymer and nanocomposites that can be derived from biorenewable resources. It covers various aspects of biobased polymers and nanocomposites, including preparation, processing, properties, and performance, and the latest advances in these materials. It also includes recent findings from leading researchers in academia and industry, government, and private research laboratories around the globe, providing the latest information on biobased polymers and nanocomposites. Offering an overview of the entire production process, it guides readers through all stages, from the raw source materials, processing and property characterization to application performance. This book is suitable for professionals and researchers seeking in-depth practical information as well as the fundamental science behind this. It also serves as a point of reference for undergraduate and graduate students, as well as postdoctoral researchers working in the area of polymer and composites with a special emphasis on biobased materials.

Hasan al-Banna-Gudrun Krämer 2014-06-01 Hasan al-Banna (1906 – 1949) was an Egyptian political reformer, best known for establishing the Muslim Brotherhood, an Islamist organisation which today has millions of members and spans the Arab world. Through his ardent struggle to revitalise Islamic values amid increasing Westernisation, al-Banna promoted Islamic charity and personal piety throughout Egypt, becoming a powerful political force until his mysterious assassination. In this well written and impartial biography, Krämer gives a detailed account of al-Banna's life and work.

Sustainable Polymer Composites and Nanocomposites-Inamuddin 2019-02-01 This book presents emerging economical and environmentally friendly polymer composites that are free of the side effects observed in traditional composites. It focuses on eco-friendly composite materials using granulated cork, a by-product of the cork industry; cellulose pulp from the recycling of paper residues; hemp fibers; and a range of other environmentally friendly materials procured from various sources. The book presents the manufacturing methods, properties and characterization techniques of these eco-friendly composites. The respective chapters address classical and recent aspects of eco-friendly polymer composites and their chemistry, along with practical applications in the biomedical, pharmaceutical, automotive and other sectors. Topics addressed include the fundamentals, processing, properties, practicality, drawbacks and advantages of eco-friendly polymer composites. Featuring contributions by experts in the field with a variety of backgrounds and specialties, the book will appeal to researchers and students in the fields of materials science and environmental science. Moreover, it fills the gap between research work in the laboratory and practical applications in related industries.

Intelligent Systems Design and Applications-Ajith Abraham

Pakistan's Drift into Extremism: Allah, the Army, and America's War on Terror-Hassan Abbas 2015-03-26 This book examines the rise of religious extremism in Pakistan, particularly since 1947, and analyzes its connections to the Pakistani army's corporate interests and U.S.-Pakistan relations. It includes profiles of leading Pakistani militant groups with details of their origins, development, and capabilities. The author begins with an historical overview of the introduction of Islam to the Indian sub-continent in 712 AD, and brings the story up to the present by describing President Musharraf's handling of the war on terror. He provides a detailed account of the political developments in Pakistan since 1947 with a focus on the influence of religious and military forces. He also discusses regional politics, Pakistan's attempt to gain nuclear power status, and U.S.-Pakistan relations, and offers predictions for Pakistan's domestic and regional prospects.

Handbook on Islam and Economic Life-M. Kabir Hassan 2014-12-31 Handbook on Islam and Economic Life is a unique study, one of the first of its kind to consider Islam within a broader economic sphere. Covering a wide breadth of topics and research, it explores how Islam impinges upon and seeks to shape major aspect

Advances in Human Factors, Business Management and Society-Jussi Ilari Kantola 2018-06-26 This book presents practical approaches for facilitating the achievement of excellence in the management and leadership of organizational resources. It shows how the principles of creating shared value can be applied to ensure faster learning, training, business development, and social renewal. In particular, it presents novel methods and tools for tackling the complexity of management and learning in both business organizations and society. Discussing ontologies, intelligent management systems, methods for creating knowledge and value added, it offers novel insights into time management and operations optimization, as well as advanced methods for evaluating customers' satisfaction and conscious experience. Based on two conferences, the AHFE 2018 International Conference on Human Factors, Business Management and Society, and the AHFE 2018 International Conference on Human Factors in Management and Leadership, held on July 21–25, 2018, in Orlando, Florida, USA, the book provides both researchers and professionals with new tools and inspiring ideas for achieving excellence in various business activities.

ISIS-Michael Weiss 2016-03-29 Hardcover edition has a map on the endpapers.

Novel Ideas for Successful Innovations-M. H. Hassan 2017-08-02 The vast majority of inventors (97%) do not make a penny from their inventions despite their hard work, efforts, time, and expenses. It costs more than a year and a lot of money to develop one patent and it requires more money to maintain the patent during its lifetime. Yet, many inventors will get a nice patent that can be framed and proudly displayed without making a single buck out of it. This book is intended to give inventors, corporations and engineers, a helping hand to explore the systematic techniques and venues that can fulfill every inventor's dream. No one can tell you how to become a billionaire; however, this book will teach you how to create/get innovative ideas that may sell; and hence, it may lead you to be a very successful inventor. This book can also be used as a reference for executives, leaders, employers and employees, practicing engineers, professionals, and technicians to become more effective, more productive and more successful in their workplace. It is also a great reference to faculty and students at all levels and from all fields and majors. Consequently, this book will prepare the readers to become leaders and mentors of modern systems innovation and design. The readers may also find opportunities to develop their own successful enterprises in today's competitive market. ABOUT THE AUTHOR: M.H. Hassan, PhD, PE has over 25 years of experience as a professor and consulting engineer specializing in the field of Electrical Engineering with specific knowledge and expertise in the areas of: Creativity, Innovation, Microprocessors, Microcomputers, Systems Engineering, Electrical Systems, Electronics Engineering, Computer Engineering, Microelectronics, Analog Integrated Circuits, Digital Integrated Circuits, Mixed-Signal Integrated Circuits, and Programmable Chips. Dr. Hassan is a research scientist with a large number of peer-reviewed scientific papers. He is also an inventor with three granted US patents and a member of the Inventors Council of Central Florida. Dr. Hassan is a senior member of IEEE, a member of Sigma Xi, a member of Tau Beta Pi, and a member of Eta Kappa Nu, . He is the

recipient of the IEEE Outstanding Engineering Educator award and many other awards and recognitions. Dr. Hassan had courses on Creativity, Innovation, and TRIZ theory with Dr. G. Graham Allan and Zinovy Y. Royzen (University of Washington) and Dr. Sidney J. Parnes (State University College at Buffalo).

Daily Graphic-Ransford Tetteh 2014-03-05

Green Fashion Retail-Jochen Strähle 2016-10-18 This book focuses on sustainability in fashion retail, which is fast becoming the pivot point of future fashion retail strategies. Chapters in the book provide theoretical and practical insight on how going green may positively influence the strategy of fashion retailers and marketers, who have to react to the changing society and customer needs. Structured in four main parts, and based on distinct research questions, readers will be able to dig deep into the individual levers for possible adaptations. It thus provides a solid understanding on how to integrate green aspects into any fashion retailers business model.

Marketing-Rosalind Masterson 2017-08-21 This book is not available as a print inspection copy. To download an e-version click here or for more information contact your local sales representative. Get 12 months FREE access to an interactive eBook when purchasing the paperback* Previous edition winner of the British Book Design and Production Award for "Best Use of Cross Media 2014" This easy to use resource allows students to switch from digital to the print text and back again, opening windows to the world of marketing through cases that are vibrant and engaged, links that allow students to explore topics in more detail and content to encourage relating theory to practice. Recognizing the importance of ongoing technological and social developments and the increasing connectedness of consumers that has profound implications for the way marketing operates and students learn, the 4th edition demystifies key technologies and terminology, demonstrating where and how emerging digital marketing techniques and tools fit in to contemporary marketing planning and practice. The new edition welcomes a new 3rd author and has been fully updated to include: 31 New case studies (including 5 new end of chapter and 26 new 'focus boxes'), featuring a greater number of case studies from digital/social media marketing, Uber and the sharing economy, Google and crowdsourcing and Amazon's drone delivery service. Even more content on digital marketing integrated throughout, including key issues such as social media, mobile marketing, co-creation, cutting edge theory. A fully updated and streamlined interactive eBook led by student feedback. Focus boxes throughout the text such as Global, Consumer, B2B and Ethical - all with a greater emphasis on digital communication - reinforce key marketing trends and relate theory to practice. Each chapter also ends with a case study revolving around topics, issues and companies that students can relate to such as Taylor Swift taking on Spotify. The new edition comes packed with features that can be used in class or uploaded onto a course management system and which students can use in their own self-directed study. Furthermore, the book is complemented by a FREE interactive eBook with access to web links, video links, SAGE journal articles, MCO's, podcasts and flashcards, allowing access on the go and encouraging learning and retention whatever the learning style. Suitable as core reading for undergraduate marketing students. *Interactivity only available through Vitalsource eBook included as part of paperback product (ISBN 9781526426321). Access not guaranteed on second-hand copies (as access code may have previously been redeemed).

Statistical Methods and Applications in Insurance and Finance-M'hamed Eddahbi 2016-04-08 This book is the outcome of the CIMPA School on Statistical Methods and Applications in Insurance and Finance, held in Marrakech and Kelaat M'gouna (Morocco) in April 2013. It presents two lectures and seven refereed papers from the school, offering the reader important insights into key topics. The first of the lectures, by Frederic Viens, addresses risk management via hedging in discrete and continuous time, while the second, by Boualem Djehiche, reviews statistical estimation methods applied to life and disability insurance. The refereed papers offer diverse perspectives and extensive discussions on subjects including optimal control, financial modeling using stochastic differential equations, pricing and hedging of financial derivatives, and sensitivity analysis. Each chapter of the volume includes a comprehensive bibliography to promote further research.

The Routledge Handbook of Community Based Tourism Management-Sandeep Kumar Walia 2020-12-20 This Handbook offers an up-to-date and comprehensive overview of core themes and concepts in community-based tourism management. Providing interdisciplinary insights from leading international scholars, this is the first book to critically examine the current status of community-based tourism. Organised into five parts, the Handbook provides cutting-edge perspectives on issues such as Indigenous communities, tourism and the environment, sustainability, and the impact of digital communities. Part 1 introduces core concepts and methodologies, and distinguishes community products from other tourism and hospitality goods. Part 2 explores communities' attitudes towards tourism development and their engagement with and ownership of the process. It also delves into the role of community-based tourism, under the influence of governmental policies, in the economic and social development of a region. In Part 3 various management, marketing, and branding initiatives are identified as a means of expanding the tourism business. Part 4 examines the negative impacts of mass tourism and its threats to culture, tradition, identity, the built environment, and natural heritage. In the final and fifth part, future challenges and opportunities for community-based tourism initiatives are considered, and research-based sustainable solutions are proposed. Overall, the book considers engaging local populations in tourism development as a way of building stronger and more resilient communities. This Handbook fills a void in the current research and thus will appeal to scholars, students, and practitioners interested in tourism management, tourism geography, business studies, development policy and practice, regional development, conservation, and sustainability.

Epilepsy Topics-Mark D. Holmes 2014-07-16 An international group of recognised experts has contributed to this volume to discuss a variety of topics on epilepsy. The subject matter is diverse, including new concepts in brain circuitry involved in seizure generation, a discussion on reflex epilepsy, reviews and updates on juvenile myoclonic epilepsy, the role of EEG in epilepsy evaluation, the novel possibility of employing scalp EEG for seizure prediction, the roles of vagus nerve stimulation and other neuromodulatory therapies, non-epileptic seizures, and, no less important, some of the psychosocial issues that confront the patient and his or her family. This volume is not a comprehensive overview of the entire field of epilepsy, but each discussion is focused and will be valuable to both investigators and practitioners.

I Am Malala-Malala Yousafzai 2013-10-08 A MEMOIR BY THE YOUNGEST RECIPIENT OF THE NOBEL PEACE PRIZE As seen on Netflix with David Letterman "I come from a country that was created at midnight. When I almost died it was just after midday." When the Taliban took control of the Swat Valley in Pakistan, one girl spoke out. Malala Yousafzai refused to be silenced and fought for her right to an education. On Tuesday, October 9, 2012, when she was fifteen, she almost paid the ultimate price. She was shot in the head at point-blank range while riding the bus home from school, and few expected her to survive. Instead, Malala's miraculous recovery has taken her on an extraordinary journey from a remote valley in northern Pakistan to the halls of the United Nations in New York. At sixteen, she became a global symbol of peaceful protest and the youngest nominee ever for the Nobel Peace Prize. I AM MALALA is the remarkable tale of a family uprooted by global terrorism, of the fight for girls' education, of a father who, himself a school owner, championed and encouraged his daughter to write and attend school, and of brave parents who have a fierce love for their daughter in a society that prizes sons. I AM MALALA will make you believe in the power of one person's voice to inspire change in the world.

Handbook of Psychocardiology-Marlies Alvarenga 2017-11-11 This handbook brings together the full weight of contemporary evidence bearing on what is now commonly termed “psycho-cardiology”. It focuses on the role of psycho-social factors in the genesis and clinical management of cardiovascular disease (CVD). The book constitutes a critically reviewed compendium of current knowledge in the area, coupled with guides to evidence-based best practice in the field of psycho-cardiology. The following categories are covered: Social/demographic risk for CVD, Personality and CVD risk, Stress and CVD risk, Psychopathology (particularly affective disorders) and CVD risk, The psychological management of those with clinical CVD, Psychology in the prevention of CVD. The book integrates the evidence into a compelling argument that clinicians, researchers and those in public health will discount the role of psychological factors in regard to CVD at their own peril. And importantly for clinicians charged with the care of patients with CVD, the book poses the argument that failure to recognize the links between psychological factors and CVD may well be at the considerable peril of those patients under their care.

IBM Content Manager OnDemand Guide-Zhu Wei-Dong 2016-05-04 This IBM® Redbooks® publication provides a practical guide to the design, installation, configuration, and maintenance of IBM Content Manager OnDemand Version 9.5. Content Manager OnDemand manages the high-volume storage and retrieval of electronic statements and provides efficient enterprise report management. Content Manager OnDemand transforms formatted computer output and printed reports, such as statements and invoices, into electronic information for easy report management. Content Manager OnDemand helps eliminate costly, high-volume print output by capturing, indexing, archiving, and presenting electronic information for improved customer service. This

publication covers the key areas of Content Manager OnDemand, some of which might not be known to the Content Manager OnDemand community or are misunderstood. The book covers various topics, including basic information in administration, database structure, storage management, and security. In addition, the book covers data indexing, loading, conversion, and expiration. Other topics include user exits, performance, retention management, records management, and many more. Because many other resources are available that address subjects on different platforms, this publication is not intended as a comprehensive guide for Content Manager OnDemand. Rather, it is intended to complement the existing Content Manager OnDemand documentation and

provide insight into the issues that might be encountered in the setup and use of Content Manager OnDemand. This book is intended for individuals who need to design, install, configure, and maintain Content Manager OnDemand.
